

# S-420i™

## Basic Description

FANUC Robotics' S-420i line of robots is engineered for maximum performance and reliability in the automotive body shop and is supported by our extensive application technology and service/parts network. The S-420i features a unique integrated controller, six-axis modular construction and a flexible, electric servo-driven design for high-speed and heavy payload processes.

### S-420i, the Solution for:

- Automotive spot welding and body assembly
- General industrial spot welding
- Material handling

### Benefits

- Work envelope allows processing of large fabrications
- Modular robot design allows conversion from one model to another
- Combined mechanical unit and robot controller reduces floor space, point-to-point wiring and installation costs
- Minimal mechanical/electrical parts increase reliability
- High motion speeds reduce time between welds
- 360° Axis 1 rotation
- User power/signal/air lines internal to arm for increased reliability
- Easy-to-learn and use application programming packages
- "Quick change" electronics cabinet reduces downtime to less than 15 minutes
- Low mass arm design allows high-speed positioning
- Proven arm design in over 13,000 S-420 robot installations

### Flexibility Features

- Extension arm, heavy payload wrist, wedge pedestal, reduction ratio and balancer modules allow simple robot conversion to single point weld, rack mount, long arm or heavy duty types
- Flexible and expandable I/O system internal to controller
- Distributed I/O blocks to reduce wiring

### Mechanical Features

- Mechanical construction provides precise positioning and high motion speed
- Direct drive on all axes results in higher reliability and reduced maintenance
- RV speed reducers provide smooth motion at all speeds and a long life
- Simple modular design with few components
- Sealed bearings and drives provide protection and improve reliability

- Absolute serial encoder positioning
- Wrist axis torque and inertia allows rated motion speed with large guns/tools
- Unique hollow RV speed reducers simplify cable routing
- Compact remote mount operator panel reduces aisle and floor space requirements
- Waist mounted forklift brackets can be used for peripheral and weld transformer mounting
- Compact arm option for close spacing of units

**FANUC**  
Robotics

## Isometric

## Control Features

- Controller provides easy installation, startup, troubleshooting and maintenance
- Stores programs in IBM DOS format
- Built-in TCP teach utility allows setup without special fixturing
- Easy-to-apply user multi-tasking programming environment
- Six-axis servo drive and single board control maximizes integration and reliability
- Distributed I/O blocks eliminate costly multi-conductor cables
- Common SYSTEM Robot Controller interface to PLC, peripheral control, valve packs, robot programs and training increase customers' ease-of-use
- Advanced TurboMove motion control increases throughput

## Software Features

- Teach pendant uses menu-driven, plain English commands and process-specific, built-in functions
- English commands, comments, user-defined jog frames and consistent speed paths make setup and programming quick and easy
- Tool packages allow positional and speed adjustments during robot cycles
- SpotTool soft panel on teach pendant reduces hard wired buttons, switches and signals lights

- Other standard software features include:
  - Alarm logging and diagnostics
  - Simple robot setup
  - Production monitoring
  - File utilities
  - Menu windows
- Optional SpotWorks cell PC graphical interface supplements controller functionality and provides the following features:
  - Cause and recovery fault diagnostics
  - Three-dimensional path editor
  - PLC connectivity support
  - Weld controller network support
  - On-line manuals
  - Direct PC connection on plant network

## Options

- Internal arm user I/O and power wiring and air tube
- Tool Frame adjustment
- Ethernet and RS-232 Communications
- Remote TCP programming and jogging control
- Remote cabinet mounting with 7m (23 ft.) or 14m (46 ft.) cables
- CSA approval option

## Footprint

## Mounting plate (FANUC std)

## Mounting plate (ISO std)

## Operation box

## S-420i Product Line

Family of S-420i Robots

Model	Reach	Purpose
S-420iF	2.4m (7ft, 11in)	Floor mount
S-420iF	2.85m (9 ft, 4 in)	Floor mount
S-420iL	3.0m (9 ft, 9 in)	Long arm
S-420iS	2.25m (7 ft, 5 in)	Single point
S-420iW	2.4m (7 ft, 11 in)	Heavy duty
S-420iR	3.11m (10 ft, 2 in)	Rack std duty
S-420iR	3.11m (10 ft, 2 in)	Rack hvy duty
